Propagation and transmission in homogeneous media

Inductive forces generated by evanescent light fields: application to local probe microscopy, F. Depasse and D. Courjon 87 (1992) 79
Non-paraxial relations of equivalence between an arbitrary refracting surface of revolution and the phase transmittance function, J. Sochacki 87 (1992) 84
A wave equation proof of Gabor's beam expansion theorem, R. Barakat 87 (1992) 139
Scattering of spectral lines by a ground glass diffuser, J.S. Vaishya, M. Chander, H.C. Kandpal and K.C. Joshi 87 (1992) 144
Spectral shift in a multimode laser due to source correlation, H.C. Kandpal, J.S. Vaishya, M. Chandra and K.C. Joshi 87 (1992) 147
Geometric phase induced changes in the correlation properties of the entangled states, G.S. Agarwal 87 (1992) 193
Real-time double-exposure interferometry using self-pumped conjugator with Cu:KNSBN, J. Zhang, H. Xu, H. Pu, Y. Yuan, K. Xu and Q. Jiang 87 (1992) 263
Time-resolved measurement of spatial coherence of a copper vapor laser beam using a reversal shear interferometer, T. Omatsu, K. Kuroda and T. Takase 87 (1992) 278
Quantum effects in the polarization of light propagation in a Kerr medium, R. Tanaś and Ts. Gantsog 87 (1992) 369

Propagation and transmission in inhomogeneous media

Observation of the enhancement of coherence by backscattering through turbulence, A.N. Bogaturov, A.A.D. Canas, J.C. Dainty, A.S. Gurvich, V.A. Myakinin, C.J. Solomon and N.J. Wooder 87 (1992) 1
Diffractometry through multiple scattering media, I. Freund 87 (1992) 5
Influence of external birefringence on quantum beats in forward scattering in Voigt configuration. The 3 $^2S_{1/2}$↔3 $^2P_{3/2}$ sodium transition, J. Koperski, K. Szymaniec and T. Dohnalik 87 (1992) 196

Optical information, image formation and analysis, optical computing

Real-time 3-D imaging of the fundus by scanning laser ophthalmoscopy, K. Kobayashi, H. Matsui, H. Nakano and T. Asakura 87 (1992) 9
Design of binary phase-only filters implemented with computer-generated holograms, Q. Tang, B. Javidi, E. Jäger and T. Tschudi 87 (1992) 87
Analysis of threshold modulations in one-dimensional error diffusion, K. Daels, R.L. Easton and R. Eschbach 87 (1992) 93
Optical morphological image processing with acoustooptic devices, R.A. Athale, J.N. Mait and D.W. Prather 87 (1992) 99

Real-time edge enhancement with hybrid amorphous silicon/ferroelectric liquid crystal devices, C.C. Mao and K.M. Johnson 87 (1992) 150
Threshold of selfenhancement in lithium niobate, J. Otten, A. Ozols, M. Reinfelde, A. Bledowski and K.H. Ringhofer 87 (1992) 157
Rapid, supervised training of a two-layer, opto-electronic neural network using simulated annealing, N.M. Barnes, A.W. O'Neill and D. Wood 87 (1992) 203
Use of polarisation in double passage imaging through a random screen, C.J. Solomon and J.C. Dainty 87 (1992) 207
High resolution imaging of dielectric surfaces with an evanescent field optical microscope, N.F. van Hulst, F.B. Segerink and B. Bölger 87 (1992) 212
Rotational invariant pattern recognition with the method of circular harmonics using a $BaTiO_3$ crystal, C.-C. Chang, H.-F. Yau, Y.-P. Tong and N.-W. Puh 87 (1992) 219
Binary representation of nonlinear correlators, B. Javidi and Q. Tang 87 (1992) 287

Optical communications

Partial soliton communication system, H. Kubota and M. Nakazawa 87 (1992) 15
Bistable bright solitons in dispersive media with a linear and quadratic intensity-dependent refraction index change, J. Herrmann 87 (1992) 161
10 μm frequency-referenced saturation spectroscopy using a single carbon dioxide laser, Ch. Chardonnet, R.J. Butcher, W. Höhe and G. Charton 87 (1992) 223

Atomic and molecular physics

Hybrid transitions in sodium dimers by laser absorption spectroscopy, A.S. Naqvi, K. Naveedullah, A.M. Azzeer and M.S. Al-Salhi 87 (1992) 36

Condensed matter

Infrared nonlinearity of commercial Cd(S, Se) glass composites, H. Ma, A.S.L. Gomes and C.B. de Araujo 87 (1992) 19
An explanation for the "weak" fluence broadening of spectral holes in glasses, P.J. van der Zaag 87 (1992) 228

Plasmas

Gain scaling relationships for Ne-like Ge slab targets, D. Neely, C.L.S. Lewis, D.M. O'Neill, J.O. Uhomoibhi, M.H. Key, S.J. Rose, G.J. Tallents and S.A. Ramsden 87 (1992) 231
Pulsed X-ray emission and resonance absorption in a 1.053 μm laser produced plasma, C. Arnas, J. Briand, J.F. Moor, A. Gomes and M. Armengaud 87 (1992) 237

Lasers

The cw modeless laser: model calculations of an active frequency shifted feedback cavity, I.C.M. Littler and J.H. Eschner 87 (1992) 44
Regenerative amplification of a weak cw optical signal in an active frequency shifted feedback cavity, I.C.M. Littler, K. Bergmann and R. Roy 87 (1992) 53

The birefringent cavity: laser frequency stabilization with a novel tuning scheme, I.C.M. Littler, P. Jung and K. Bergmann 87 (1992) 61
Mode theory of FEL amplifier with gradient profile of electron beam, E.L. Saldin, E.A. Schneidmiller and M.V. Yurkov 87 (1992) 69
Characteristics of high-power excimer laser master oscillator power amplifier system for dye laser pumping, Y. Maruyama, A. Sugiyama, A. Ohzu and T. Arisawa 87 (1992) 105
Lasing without inversion and enhancement of the index of refraction via interference of incoherent pump processes, M. Fleischhauer, C.H. Keitel, M.O. Scully and C. Su 87 (1992) 109
Influence of electron heating on the dynamic behaviour of semiconductor injection lasers, A.G. Plyavenek 87 (1992) 115
Spectral shift in a multimode laser due to source correlation, H.C. Kandpal, J.S. Vaishya, M. Chandra and K.C. Joshi 87 (1992) 147
A new approach to the correlated emission laser gyroscope, H. Heitmann 87 (1992) 166
Gain scaling relationships for Ne-like Ge slab targets, D. Neely, C.L.S. Lewis, D.M. O'Neill, J.O. Uhomoibhi, M.H. Key, S.J. Rose, G.J. Tallents and S.A. Ramsden 87 (1992) 231
A tunable three-level neodymium-doped fiber laser and its application to depletion of the $4f^{14}$ 5d $^2D_{3/2}$ level in optically excited, trapped ytterbium ions, Chr. Tamm and D. Schnier 87 (1992) 240
Observation of the temporal evolution of transverse coherence in copper vapour lasers, D.W. Coutts, M.D. Ainsworth and J.A. Piper 87 (1992) 245
Generation of ultrashort far-infrared pulses optically pumped with truncated hybrid 10 μm CO_2-laser pulses, D.P. Scherrer, A.W. Kälin, R. Kesselring and F.K. Kneubühl 87 (1992) 249
Deterministic diffusion of a laser variable, M.Y. Li, C.O. Weiss and N.R. Heckenberg 87 (1992) 254
Non-orthogonality of the longitudinal eigenmodes of a distributed feedback laser, P. Szczepański and A. Kujawski 87 (1992) 259
Spectrum of squeezing for two-photon correlated-spontaneous-emission lasers, N. Lu 87 (1992) 298
The influence of noise and angular dispersion during short pulse Raman amplification, K.E. Hill, G.H.C. New, P.A. Rodgers and K. Burnett 87 (1992) 315
Lasing without inversion in a simple model of a three-level laser with microwave coupling, H. Fearn, C. Keitel, M.O. Scully and S.-Y. Zhu 87 (1992) 323
Towards the 10^{19}–10^{20} W/cm^2 regime with amplified chirped pulses: basic limitations and solutions, S. Seznec, C. Sauteret, S. Gary, E. Béchir, J.L. Bocher and A. Migus 87 (1992) 331

Nonlinear optics

Infrared nonlinearity of commercial Cd(S, Se) glass composites, H. Ma, A.S.L. Gomes and C.B. de Araujo 87 (1992) 19
High power, subpicosecond, 750–1770 nm tunable pulses from travelling wave parametric generator, R. Danielius, A. Piskarskas, D. Podenas, P. Di Trapani, A. Varanavičius and G.P. Banfi 87 (1992) 23
Self-focusing of short light pulses in dispersive media, P. Chernev and V. Petrov 87 (1992) 28
Picosecond optical parametric generation in flux grown KTP, H. He, Q. Zhao, J. Guo, Y. Lu, Y. Liu and J. Wang 87 (1992) 33
Fluctuations in coherent pulse propagation, Y. Adamu and G.H.C. New 87 (1992) 122
Conditions for sub-poissonian photon statistics in phase conjugated resonance fluorescence, H.F. Arnoldus and T.F. George 87 (1992) 127
Ultra-large index of refraction via quantum interference, M.O. Scully and S.-Y. Zhu 87 (1992) 134
Intensity stabilization in photorefractive two-wave mixing by controlling the phase shift

of the fringe, T. Shimura, H.Y. Miao, M. Itoh and K. Kuroda 87 (1992) 171
Formal quantum theory of electronic rays, G. Dattoli, L. Giannessi, C. Mari, M. Richetta and A. Torre 87 (1992) 175
Squeezing spectrum for radiation of atoms in two laser fields, G.Yu. Kryuchkyan and K.V. Kheruntsyan 87 (1992) 181
Spatial pattern formation for counterpropagating beams in a Kerr medium: a simple model, J.Y. Courtois and G. Grynberg 87 (1992) 186
Rotational invariant pattern recognition with the method of circular harmonics using a $BaTiO_3$ crystal, C.-C. Chang, H.-F. Yau, Y.-P. Tong and N.-W. Puh 87 (1992) 219
Real-time double-exposure interferometry using self-pumped conjugator with Cu:KNSBN, J. Zhang, H. Xu, H. Pu, Y. Yuan, K. Xu and Q. Jiang 87 (1992) 263
Quantum fluctuations and diffraction in stimulated Raman scattering, M. Scalora and J.W. Haus 87 (1992) 267
High-efficiency infrared generation by difference-frequency mixing using tangential phase matching, M.J.T. Milton, T.J. McIlveen, D.C. Hanna and P.T. Woods 87 (1992) 273
Towards the 10^{19}–10^{20} W/cm^2 regime with amplified chirped pulses: basic limitations and solutions, S. Seznec, C. Sauteret, S. Gary, E. Béchir, J.L. Bocher and A. Migus 87 (1992) 331
Two-wave mixing with cross-polarized beams in sodium: a quantitative investigation, M. Vallet, M. Pinard and G. Grynberg 87 (1992) 340
Higher order self-diffraction in absorptive photorefractive medium; transmission geometry, A. Roy and K. Singh 87 (1992) 351
Gain and reflectivity characteristics of self-oscillations in self-feedback and delayed feedback devices, M. Le Berre, E. Ressayre and A. Tallet 87 (1992) 358
Quantum effects in the polarization of light propagating in a Kerr medium, R. Tanaś and Ts. Gantsog 87 (1992) 369
